

IS YOUR
INDOOR
AIR THIS
FRESH?

TESTIMONIALS:

Michael Beuerlein of Eagle Indoor Air has been a valuable resource for our mold remediation division. His knowledge and expertise have guided us through some of our most challenging remediation projects. Thank you, Michael!

—Kevin Swank, Vice President, Premier Restoration, Inc.,
Jonesboro, GA

Eagle Indoor Air was my salvation on a mold issue and liability threat. The client could have been a real risk to our company had we not contacted Eagle Indoor Air and followed their guidelines.

—Corinne Everly, The McDougal Company, Columbus, GA

We have used Eagle Indoor Air and have always been very pleased with their services, including inspections, protocols, and comments. We have found that Mike combines technical knowledge with common sense to offer good, workable solutions.

—Buddy Fitzgerald, Servpro of Albany, Albany, GA

ABOUT US

Eagle Indoor Air is a small, independent indoor air quality (IAQ) firm in Atlanta, GA, that offers residential and commercial IAQ services at a fraction of the cost charged by its competitors.

Eagle Indoor Air is committed to healthy indoor environments, whether at home or at work. We provide a fresh approach to indoor air quality by identifying complex problems at the source rather than simply having you treat the symptoms.

An accurate diagnosis the first time around can save you time and money in the long run. We can't bottle fresh mountain air for you, but we can make breathing indoors feel just as good.

SERVICES

- Indoor air quality evaluations
- Mold remediation protocols
- Clearance evaluations
- Air, bulk, and surface sampling
- Airflow analysis

Our basic diagnostic service typically includes an initial site visit, inspection, sampling and testing if necessary, and a complete, easy-to-read follow-up report that outlines both the problem and the solution. This report is usually delivered within five business days of the initial visit.

WHY WE'RE DIFFERENT

Most indoor air quality (IAQ) problems can be traced back to a single source: moisture. Although problems like radon and asbestos can certainly cause trouble, moisture is responsible for the growth of mold and therefore the vast majority of health problems related to indoor air.

Eagle Indoor Air targets unwanted moisture and pinpoints whatever problem is causing it. This is what makes us different from—and a step above—our competitors.

If you get rid of the moisture, you'll get rid of the mold. It's as simple as that. If you don't get rid of the moisture, you can assault mold with all the weapons in your arsenal and it won't do any good. You may win the battle temporarily, but it won't change the outcome of the war.

Contact us today to see how we can help.
